Smart learning 5
Boost your memory strength with our smart algorithm's suggestions

- 1.1.1 Types of Cells
- 1.1.2 Properties of Prokaryotes
- 1.1.3 Standard Form
- 7.1.1 Communities
- 7.1.2 Communities 2

Regular retrieval practice

- improves your GCSE by a whole grade.

Smart Learning Mode tells you what to learn and when to maximise your progress for a subject. The smart algorithm will use insights from cognitive neuroscience & AI to generate recommendations of which sections you should study for a particular course.

What does the small intestine do?

- Absorbs water molecules
- Absorbs soluble food molecules ✓
- Digests food ✓
- Produces bile

Which part of the enzyme binds with the substrate?

Active site

Revision mats can be obtained from class teachers for all topics.

Bitesize: Staff can also recommend various phone revision apps some of which are free like bbc bitesize while others include some in-app charges.

Key Topic Videos

Scan the QR code and watch the short Craig 'n' Dave videos summarising the key topics

Past papers are available from class teachers.
